

Ceylon Connect

Sri Lanka Integrated Tourist Experience Platform

Ceylon Connect is a comprehensive tourist experience platform designed specifically for Sri Lanka's growing tourism industry. The system serves as a one-stop solution for international and local tourists, enabling them to discover and book travel packages, accommodations, and local experiences such as cultural tours, wildlife safaris, water sports, and cooking classes ,all from a single platform. Beyond standard booking features, the platform integrates an Emergency and Tourist Assistance Service that provides real-time SOS alerts, nearest hospital and police station locators, embassy contact information, and a lost-and-found registry, addressing a critical gap in tourist safety infrastructure in Sri Lanka.

The system is designed using a Microservices Architecture, decomposed into eight independent, loosely coupled services: User & Auth Service, Tour Package Service, Hotel & Accommodation Service, Payment Service, Local Experience & Activity Service, Emergency & Tourist Assistance Service, Complaint & Feedback Service, and Notification Service. Each service operates independently, communicates via APIs, and can be scaled or updated without affecting the rest of the system. The intended users include international tourists, local travelers, travel agencies, hotel vendors, activity providers, and the Sri Lanka Tourism Development Authority (SLTDA), making Ceylon Connect a truly enterprise-grade platform that addresses real-world challenges in Sri Lanka's tourism ecosystem.
